Stan Klimoff

Станислав Климов

I'm interested in all sorts of middleware, particularly networked ones. My other interests include computer language engineering and the Web in its most general sense.

Skills

Languages	C#, Java, Scala, ActionScript, Python, C++.
.NET	5 years of experience, Remoting/Web Services, ASP.NET, MonoRail, nHibernate, Spring.NET.
Java	1 year of experience, maven, Spring, OSGi.
XML	advanced XML skills, basic XSL knowledge.
Networking	advanced knowledge on the principles of TCP/IP networks operation.
DBMS	Advanced knowledge of T-SQL, familiar with MySQL. Experience with Firebird (former Borland Interbase).
Semantic Web	Familiar with RDF/RDFS/OWL stack, Turtle and RDF/XML serialization. Intermediate SPARQL skills. Working knowledge of Jena framework.
Systems interconnection	Knowledge of CORBA concepts, experience with XML/RPC.
Windows programming	WinAPI knowledge; familiar with COM concepts.
Webmastering	Advanced knowledge of HTML 4.0, XHTML 1.1, CSS 2. Intermediate knowledge of JavaScript. Familiar with WAI concepts.
RIA	Advanced Adobe Flex (Cairngorm, FlexUnit, m2f2).
PHP	Advanced knowledge of PHP, familiar with Smarty engine and Mojavi framework.
Processes	Basic knowledge of UML and IDEF0. Working knowledge of test/behavior driven development.

Professional Experience

Grid Dynamics

July 2007 – ...

Sr. Software Engineer & Team Leader

Project Dagwood

Client-server software for management of a customer homegrown grid (15K nodes). Architecture and design of the system. Strategic development. General management and coordination. Implementation of the client-side application. *Java 5, Jena, Flex; group of four*

May 2007 – July 2007

Software Engineer

Project Luna

Performance testing and tuning of the GigaSpaces 6 in-memory datagrid engine. Implementation of messaging system over the datagrid. Implementation of distributed initial data loading facility. Setup and support of a remote lab. *Java 5, GigaSpaces, ganglia, netlogger*

Selectosa Systems

December 2003 – May 2007

Software Engineer

Project Poker

Designed and leded the development of the online poker house software. Implemented the central authorization and transaction processing server. *.NET, Remoting, ASP.NET, MSSQL; group of three*

Project Columns

Designed and implemented data normalization software based on embedded script environment. *.NET, Lisp*

Project GlucoseMeter

Designed and leded the development of the prototype software for the talking glucose meter. *C++/WinAPI, Speech API; group of two*

Professional Experience (continued)

Project ACB Designed and leded the development of the online American Council of the Blind database. *accessibility, PHP, MySQL, Mojavi; group of two*

Project PG Designed and implemented a service-oriented photo gallery with photographers' frontend. *.NET, MSSQL, SOAP, ASP.NET*

Saratov State University

March 2002 — December 2003 *Network Engineer*

Project pterm Developed a management and monitoring system for the EFData SDM-7000 satellite modem. *C++/Linux, Perl.*
